- Equipped with infrared LED lights
- IR distance: 16 - 26 feet (interior)
33 - 49 feet (exterior)

AUDIO

- Built-in noise-gated microphone (interior only)

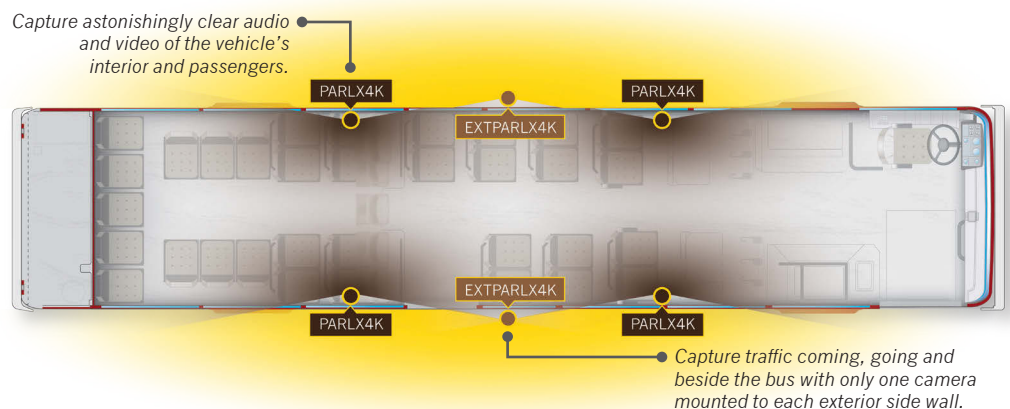

PROTECTION RATING

CAMERA FEATURES ▼

Each patent-pending Parallax Series camera captures a profoundly superior video picture with an outstanding horizontal resolution exceeding cinema 4K. Each camera provides over 200 degrees of coverage and zoomed image clarity never before available in the industry.

PARALLAX VIEW™ ▼

Combining four interior Parallax cameras in a quad configuration delivers an unparalleled 360-degree interior view of the front, middle and back of the bus without the image distortion common with conventional wide-angle or fisheye cameras. Each exterior camera captures a field of view wide enough to include the exterior wall of the bus, from front end to back.
