

BEV360

Vulcan™ Series Bird's Eye View 360-Degree Camera System

BIRD'S EYE VIEW WITH AI-POWERED STUDENT DETECTION ▼

The BEV360 Bird's Eye View 360-Degree Camera System features four 1080P cameras for a panoramic view of the vehicle's surrounding area, a seven-inch monitor for the driver's real-time reference, and a system control box for storage and AI technology. The system captures clear video and stitches all views together, forming a 360-degree bird's eye view displayed on the monitor for the driver's reference. Using AI detection technology, the system identifies students around the vehicle in real time and warns the driver when pedestrians enter the danger zone in close proximity to the vehicle. The system has two microSD card slots for recording as a stand-alone unit. For recording to a Vulcan Series MDVR or MNVR, the system includes a cable for connection to one HD port on the MDVR/MNVR.

FEATURES ▼

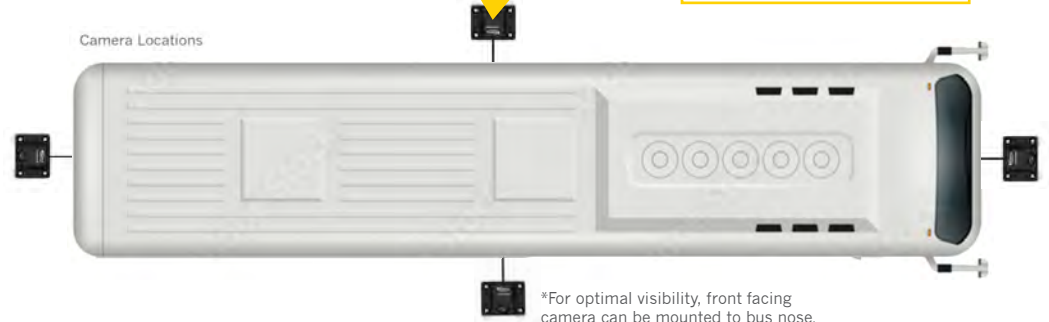

- AI-POWERED PEDESTRIAN DETECTION with audible alerts
- 360-DEGREE PANORAMIC VIEW with four 1080P cameras
- REAL-TIME MONITORING on a 7-inch display
- STAND-ALONE SYSTEM with microSD card storage

2MP HD CAMERAS

- 1.8mm Lens
- Extreme Wide Angle
- Shorter Focal Length
- 184° Horizontal FOV

184°

*For optimal visibility, front facing camera can be mounted to bus nose.
